

# Contrac®

## OUTSTANDING BAIT ACCEPTANCE AND RODENT CONTROL

- The taste they can't resist

- Blox are easily secured in mouse or rat bait stations

## Contrac®

### ✓ Effective

- A single-feeding anticoagulant bait containing Bromadiolone
- Excellent for controlling mice and rats, including warfarin-resistant Norway rats
- Ideal to use as a clean-out and maintenance bait

### ✓ Palatable

- Formulated with over 16 food-grade ingredients and taste enhancers
- The preferred bait of rats and mice when tested against other bromadiolone baits on the market

### ✓ Weatherable

- Extruded Blox offers extraordinary palatability
- Bell's meal bait comes packaged in polyglassine place packs to increase weatherability of this formulation

# Contrac®

## Meal

- Ideal to use if there is the possibility that rodents may transport bait to sensitive areas near food, children or pets
- While the least weatherable bait form, contains seeds and grains which give rodents a variety of textures and flavors
- Packaged in polyglassine place packs for added weatherability - unique polyglassine material allows scent of bait to escape to attract rodents, but protects the bait from dirt and moisture

## Blox

- High weatherability – can be used in damp conditions
- Multi-edge extruded Blox appeal to rodents' desire to gnaw
- Blox fit in Bell's mouse and rat-size, tamper-resistant bait stations or can be nailed to rafters and ceilings or hung in hard-to-reach places where rodents travel
